

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph on page 10, between lines 24-32 of the specification with the following:

In Fig. 6 can also be observed that a number of views have the same viewing angle.

For instance the view corresponding to the black dot with reference number 602 has the same viewing angle as the view corresponding to the black dot with reference number 608 606. That means that the same image data is to be provided for creating these views.

Further, the viewing angles of the respective views corresponding to the black dots with reference numbers 608 and 618 are mutually equal. The same holds for the views corresponding to the black dots with reference numbers 610 and 616 and for the views corresponding to the black dots with reference numbers 612 and 614. As a consequence, only five sets of image data have to be provided for the creation of the nine views.
